

Jeremy Alejandro Villegas Rodríguez

Identification card: 1-1891 -0511

Cellphone Number: 7116-6473

Email: jrodriguez118910511@gmail.com

Date of Birth: November 15, 2003.

Professional Summary

Software Engineer with broad experience in data analysis, reporting automation and resource-driven planning. I bring over four years of technical expertise (Excel, Power BI, KNIME, VBA, SQL, SAP, Python, Azure) and three years supporting workload allocation, capacity planning and cross-regional coordination. I have partnered with teams across EMEA, NA and LATAM, managing operational peaks and incident-based reprioritization. Recognized for precision, fast problem-solving and developing SOP-based processes that strengthen data integrity and operational stability.

Education

Bachelor of Software Engineering | Universidad Cenfotec | Jan 2022 to Dec 2025

High School Diploma | San Sebastián Professional Technical College | Feb 2019 to Jun 2022

Medium Technician in Cost Accounting | San Sebastián Professional Technical College | Feb 2019 to Jan 2022

Third cycle concluded at the Liceo Teodoro Picado | Feb 2016 to Dec 2018

Work experience

P&G – Data engineer & Costing Owner | July 2024 to the present.

I work in a hybrid role that combines Costing Ownership with Data Engineering, supporting European markets through accurate cost management, data validation and continuous process improvement. I lead automation and optimization initiatives using KNIME, Power BI, Power BI Apps, VBA, Python and SQL, reducing manual workload and improving reporting speed and reliability.

I design and implement scalable dashboards, automated workflows and data pipelines using KNIME and Azure Data Factory to increase visibility and operational efficiency. I collaborate with cross-functional and cross-regional teams under Agile methodologies, adapting priorities quickly during high-demand cycles. I also support annual cost planning and ensure accuracy and consistency in standard costing processes across the Step 6 organization.

P&G – Pricing Owner | September 2022 to June 2024.

I managed end-to-end pricing operations for North America and Latin America, ensuring accuracy, timely updates and alignment with business rules across multiple markets.

Designed and implemented automation solutions in VBA that streamlined pricing model updates and significantly improved reporting efficiency. Oversaw scorecards, working files and performance reports using SAP, KNIME and Power BI, supporting leadership decisions with reliable, high-quality data. Collaborated with finance teams on reconciliation activities and contributed to monthly and quarterly reporting cycles to ensure data consistency and operational continuity.
